Who am I

Full Stack Developer with **2 years** of work experience and **1 bootcamp**, Skilled in React, JavaScript, Supabase, RESTful services. I also have solid experience with backend technologies like Node.js, Express, and MongoDB building Restful APIs. Founder of **ReapplyMe**, an application aimed at automating job applications with ease of **machine learning**

Work Experience

Project-Y Sandton, RSA
Full Stack Developer and Founding Member 2024 - Present

Project Y is a digital nation that helps tech-minded individuals build essential skills for a successful career in technology. It offers top-tier education, career support, and community access, all designed to unlock opportunities in tech

- Honed skills in key front-end technologies including React, HTML, CSS, and JavaScript, alongside back-end expertise in Node.js, Express.js, MongoDB, SQL, and Docker.
- Enhanced proficiency in Docker for streamlined containerization and mastered SQL for data manipulation.
- Demonstrated superior interpersonal abilities, excelling in team collaboration, strategic problem-solving, and clear communication.
- Coordinated and contributed to the successful execution of 40 projects with project-y members, enhancing team collaboration and project outcomes.

Euphorea Heilbron, RSA
Full Stack Developer 2022 - 2023

Euphorea is an entertainment brand specializing in music

- Optimized application performance by 40% by refactoring legacy code and implementing efficient algorithms.
- Increased user retention by 20% by implementing intuitive and responsive design in React-based web applications.
- Improved application load time, resulting in enhanced user experience and customer satisfaction.
- Enhanced user retention rates by 15% through improved UI/UX design.

Skills

Frontend: React • Nextjs • JavaScript • React Native • HTML • CSS • Redux • JavaScript • Tailwind css • Bootstrap • Typescript

Backend: NodeJS • Express • Swagger • FastAPI • PHP

DevOps: CI/CD • Docker • Kubernetes • AWS • Google cloud

Machine Learning: Python • TensorFlow • Cloud Computing • PyTorch • Transformers

Testing: Mocha • Jest

Database: SQL • MySQL • MongoDB • Firebase

Education

Re:Coded Remote
Full Stack Software Development and Artificial Intelligence 04/2024 - 10/2024

University of Johannesburg Johannesburg, RSA
Business information Technology 2020 - 2023

Strengths

- **Collaboration**
I am able to collaborate with different people on projects
- **Full stack expertise**
Proficient in front-end and backend technologies, including machine learning.
- **Performance optimization**
Enhanced application performance and reduced load times through efficient coding through debugging.
- **User engagement**
Boosted user engagement and retention with intuitive UI designs.
- **Project leadership**
Successfully led development of a major university research project.

Projects

ReapplyMe

<https://reapplyme.netlify.app/>

Sandton, South Africa

12/2024 - Present

- ReapplyMe is a modern Saas application designed to streamline the job application process by providing intelligent tools for managing job applications, generating personalized emails, and tracking career progress.
- Built a job application platform leveraging React, Tailwind CSS, Python and Supabase
 - Implemented dynamic email templates powered by Google Gemini AI, enabling users to generate personalized emails with 95% accuracy in variable substitution
 - Developed a profile management system supporting over 10+ fields for tracking skills, education, and professional milestones, enhancing user organization
